

VirTra

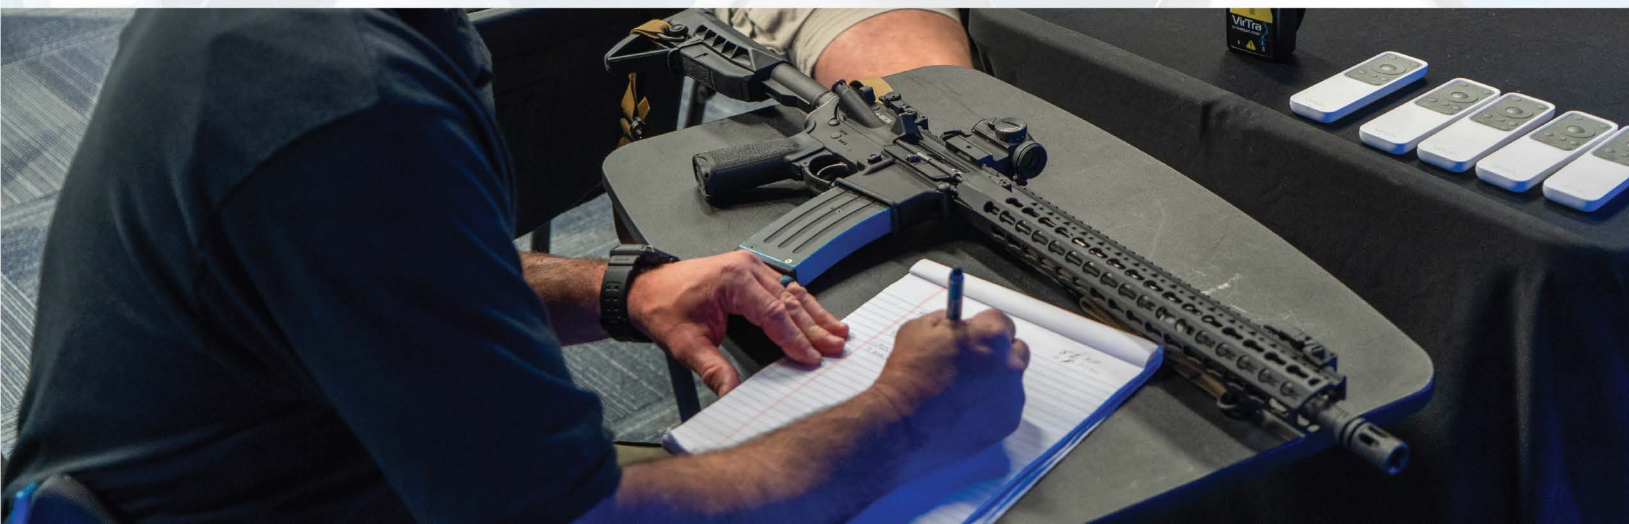

Master Class

Get the most from your new VirTra Simulator

The VirTra Master Class is a two-day on-site course designed to enhance your simulator Operator skills. Our experts will teach you how to maximize training time, ensure consistency, and leverage the strengths of the VirTra training system.

This training puts students in the driver's seat, creating and running practice events, with instructors on hand for guidance and evaluation. Comprehensive debriefs led by both the class and instructor, foster the development of advanced training skills.

Overview

- **Estimated Time** – 16 hours
- **Class Size** – Designed for pairs of officers with a maximum class size of 6 (3 pairs). If the class size is smaller than 6 (3 pairs), scenarios can be cycled through.
- **Class Objectives** – This course is designed to expand the skills of VirTra simulator operators.

By signing up for this course, your VirTra operator will be able to:

- Understand the process that goes into content production for each scenario
 - Learn how to maximize the simulator instruction and think outside the sim
 - Create a V-Author scenario
 - Create a V-Marksmanship course
 - Learn how to utilize the V-VICTA content for use as curriculum
- **Equipment Needed** – It is the customer's responsibility to have everything working. Any technical/support issues must be coordinated with VirTra and worked out prior to class. Upon scheduling a class, a representative from VirTra's Service and Support team will reach out to the customer for a maintenance check.

The following is a list of equipment that should be available to the VirTra instructor and your operators through the class.

- Projector/monitor, and speakers for PowerPoint presentation
- VirTra simulator
- Handguns (minimum of 2)
- Recoil kits for handgun and rifle (minimum of 2 for each firearm)
- Taser® (minimum of 2)
- Threat-Fire®
- Rifle (minimum of 2)
- VirTra Taser® cartridges (minimum of 4)
- Low-light flashlight

We recommend that attendees have 60 - 90 days of experience operating their VirTra simulator, as this class is rich with information and teaches advanced use of the system for those who have already grasped the basics.

This course will take place at the customer's simulator location and will be led by an experienced VirTra instructor.
