Training Capabilities That Strengthen Judgment, Performance, and Real-World Readiness

Decision-Making and Weapons Employment

Experience the future of training with features that support both lethal and non-lethal force options. Our system reinforces essential skills such as threat recognition, response selection and firing discipline.

Scenario Development and Drill Execution

Craft and deliver structured training sessions using customizable scenarios built around tailored logic, scoring parameters, and consistent drill execution, ensuring a comprehensive learning experience.

Precision Tracking and After-Action Review

APEX proprietary tracking technology enables in-depth analysis of shot placement, timing, and trainee behavior. This data enhances instructor-led after-action reviews, allowing for targeted feedback and improvement.

High-Fidelity Visual Environment

Integrated 4K laser projection provides high-resolution visuals that create an immersive, objective-driven training experience from day one.

Future-Ready Training Platform

Designed to accommodate AI-enabled features, the V-100 NG is at the forefront of the evolving VirTra ecosystem, ensuring your training remains advanced and relevant.
