

CERTIFIED TRAINING ALLIANCE (CTA)

Committed to providing high-quality, accessible training to first responders.

ONLINE TRAINING COURSES

CTA is designed by industry-leading partners as a hub for public safety to access numerous training courses to better prepare them for what they may encounter during their careers.

Leading experts have vetted each certified course to ensure maximized education and retention for adult learners.

LEARNING ON YOUR TIME

Courses are available on any device with your CTA login. This offers the ability for first responders to access training at any point in their day from their office, squad car or even the comfort of their own home. This accessibility frees up trainer time and allows trainees to learn in a way that works best for them.

TRAINING COMPATIBILITY

During or after CTA online training, officers can put their newly developed skills to the test in their department's, or even a neighboring department's, VirTra simulator. The VirTra courses were designed with the ability to be utilized with the CTA courses for a more holistic and robust learning experience with immersive and true-to-life training.

CERTIFIED COURSES

Certified Training Alliance includes courses that are NCP-certified by IADLEST, ensuring that trainees are receiving reliable and effective training to take with them throughout their careers. When courses are completed, trainees earn a certificate that they can download and/or print.

COURSE SELECTIONS INCLUDE:

Autism Awareness

Autism Awareness for law enforcement and first responders.

1 hour 30 minutes of Training Credit

Realistic De-Escalation

Concepts and methods to support de-escalation efforts when personal connections can be made.
