

Your Simulation Investment Allows For Future Growth

Not every budget allows for the most innovative and immersive training simulators. However, VirTra believes your investment in a simulator should allow future growth. Simply return your current VirTra system to receive credit for 100% of the original purchase, then use those funds to upgrade to:

V-100®

Begin with a V-100, the single screen, realistic judgmental use of force simulator.

V-180®

Upgrade your V-100 to an immersive, three-screen 180-degree firearms training simulator. The V-180 provides trainees with a realistic training environment that teaches and sustains trainees and seasoned officers or military personnel alike. Increase the training experience with this higher standard three-screen decision-making simulator.

V-300®

Upgrade your V-100 or V-180 to a complete, five-screen 300-degree intense training environment. The V-300 is equipped with powerful, high-quality scenarios and multi-directional sound to immerse trainees in de-escalation and use of force situations. Maximize training with this higher standard five-screen decision-making simulator.

How it Works

VirTra's upgrade path is simple. Upon returning your V-100 or V-180, the cost will be subtracted from the more advanced multi-screen simulator. Better training has never been easier to achieve.

With VirTra, your investment in simulation training grows with you.

Note: To be eligible for an upgrade credit, all systems must be covered under a current VirTra service agreement.
